

# ABOUT US

**The next generation fibre optic network designed and owned by Cogeco Data Services is unique in the industry. It accommodates a wide and growing range of new services and features, and offers the following specifications:**

- Built-in redundancy and disaster recovery features
- 99.999% availability
- Wave division multiplexing
- Speeds from 10 Megabits up to 1 Gigabit per second and beyond
- Multiple facilities based network cores: 10 Gigabit Native Ethernet/MPLS, DWDM, SONET

## **Connectivity**

Cogeco Data Services is at the forefront of telecom innovation. All services are delivered over the latest in Native Ethernet Fibre, not copper, providing businesses with scalable and reliable Private Line, Metro LAN, Wavelength and Internet connectivity.

## **Managed Services**

Cogeco Data Services offers businesses a range of scalable and reliable services that address key business pain points, including:

- Colocation: Cogeco Data Services' colocation facilities provide a secure hosting environment for mission critical data and operations
- Storage on Demand: Customers can take advantage of disk space on the SAN, helping them to securely grow and manage their business information
- Business Continuity: Fully managed automatic data replication, and complete server recovery within one hour of reported outage or loss
- Hosted Backup: Automated recovery and restoration of lost or corrupted data housed in Cogeco Data's state of the art data centre
- Security: Firewall services protect network and data integrity

## **Wireless Internet**

Under the brand name One Zone™, Cogeco Data Services provides complete consumer WiFi coverage in the heart of Toronto's downtown business and entertainment district, making it the largest and fastest network of its kind.

## **Customer Service**

Cogeco Data Services' state of the art Network Operations Centre provides customers with unparalleled support services including around the clock proactive network monitoring. Seasoned support professionals bring with them a proven track record and commitment to superior customer services and are available 24/7/365.
